Study Information

Study Title	Can stratification of childhood epilepsy through detailed phenotyping and whole genome sequencing identify novel genetic aetiologies and genetic modifiers of treatment response?
Brief Description	As part of this study this work aims to identify genes underlying severe paediatric epilepsy by WGS of trios and small nuclear families
REC Approval Number	Principal Investigator: Professor Sameer Zuberi GG&C HB site The Royal Hospital for Sick Children Sponsor NHS Greater Glasgow and Clyde R&D reference: GN15NE178 REC reference: 16/SS/0054 Protocol no: Version 1.1 – 04/04/2016

Ethical Approval

Name	Professor Julian Knight	
I confirm that appropriate consent and ethics approval is available for WGS analysis in each of the samples submitted
